SUMMARY

Senior Frontend Engineer / Full-Stack Engineer

(React, Next.js, TypeScript, Java, Spring, Spring Boot, Spring JPA/Hibernate)

7+ years building enterprise e-commerce and healthcare platforms with React, Next.js, TypeScript, and Node.js. Led frontend teams, mentoring, cross-team collaboration, designed scalable architectures, and delivered design systems, observability (Dynatrace, OpenTelemetry), and WCAG 2.2-compliant UIs on GCP/Azure.

SKILLS

- **Frontend:** React (React.js, ReactJS), Next.js (SSR, SSG, API Routes), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS/SASS/LESS, React Hooks, React Router, Redux Toolkit, Zustand, Jotai.
- **Testing & Quality:** Jest, React Testing Library, unit testing, integration testing, end-to-end testing, CI/CD, code review, test automation.
- **Architecture & UX:** Design systems, component libraries, Web Components, frontend architecture, performance optimization, accessibility (WCAG 2.2, ADA), responsive design, micro-frontends.
- **Backend & APIs:** Java, Spring Boot, Spring JPA/Hibernate, Node.js, Express, Python, Django, REST APIs, GraphQL, Webhooks.
- **Data & Cloud:** MongoDB, SQL, Google Cloud Platform (GCP), Microsoft Azure, Azure Pipelines/CI/CD, observability, Dynatrace, OpenTelemetry.
- **AI & Developer Tools:** AI coding assistants (Copilot, Claude Code, Agentic AI), code generation and refactoring workflows integrated into React/Next.js development.

WORK EXPERIENCE

DELOITTE USI, Gurugram, India | Software Engineer 2 | 11/2021 - Present | 4.5+ yrs

- Implemented end-to-end observability with cross-team collaboration using Dynatrace and OpenTelemetry across Backend-for-Frontend (BFF) and Frontend layers improving reliability, debugging speed, reducing time to resolution (TTR) and production support for a large-scale e-commerce platform. Tech - Next.js, TypeScript, Material UI, SCSS, GraphQL, OpenTelemetry, Jest
- Worked with GraphQL APIs & optimized client side data-fetching patterns. Evaluated and introduced modern front-end tooling such as Vite to improve build and CI/CD pipeline performance.
- Led a frontend team of 4 engineers owning sprint planning & delivery, reviewing cross-team PRs, and ensuring on-time delivery of features while maintaining ADA WCAG 2.2 compliance.
- Developed an internal **Retrieval-Augmented Generation (RAG)** Chatbot using **LangChain** and **ChatGPT**, integrating secure knowledge of healthcare procedures, policies for medical practitioners and reducing support response time by 60%.
- Developed atomic UI components and core features (login, i18n, user preferences) for an e-commerce platform with strong Jest and React Testing Library coverage, using SSR, Next.js, TypeScript, and Tailwind CSS to improve performance and maintainability.
- Designed and built a reusable frontend design system and component library to drive consistency across a healthcare platform with 3 sub-applications, reducing UI duplication and easing onboarding for new developers.
- Created a living style guide as a developer playground for testing and documenting components using HTML, CSS, JavaScript, LESS, and Microsoft Dynamics, improving documentation adoption and reuse.
- Implemented accessible UI for a healthcare application aligned with ADA and WCAG 2.2 guidelines, including NVDA and screen reader support to enhance usability for users with disabilities.
- Worked on development of healthcare application features using Lightning Web Components and Salesforce, integrating UI and platform capabilities to support clinical workflows.

PROACTIVE DATA SYSTEMS PVT LTD, New Delhi, India | Software Engineer | 06/2019 - 11/2021 | 2.5 yrs

- Delivered 6+ full-stack projects end-to-end, overseeing the complete lifecycle from ideation, requirements gathering, and UI prototyping to frontend development and production release. Implemented agile software development methodologies, improving team delivery velocity and cross-functional collaboration by 25%.
- Designed and built internal automation tools that digitized manual business processes, reducing paperwork and operational time by 40%.
- Led development of a sales order management dashboard enabling real-time visibility into order status and document access, empowering managers to approve, reject, and provide feedback seamlessly.
- Engineered a vendor-agnostic network monitoring solution integrating Cisco, Broadcom, and Netgear ecosystems under a unified interface, cutting tool-sprawl by 50%.
- Developed and launched a customer experience analytics dashboard for brick-and-mortar businesses, enhancing customer insight and engagement tracking.
- Optimized internal application build pipeline and reduced frontend bundle sizes by up to 30%, improving load times and usability on legacy systems.

EDUCATION

INDRAPRASTHA INSTITUTE OF INFORMATION TECHNOLOGY
Bachelor of Technology, Electronics & Communications Engineering

Delhi, India
Aug 2015 - Dec 2019
